

RYAN SUL

Game Designer

Decatur, GA | 585-471-0218 | kyunghwan789@gmail.com | khwon789.github.io | [LinkedIn](#)

Legal name: Kyunghwan Sul • US Citizen

Live-service game designer with 4+ years of experience shipping mobile games from concept to post-launch operations. Experienced in systems, content, events, and monetization, with additional experience independently publishing AI-assisted mobile games.

EXPERIENCE

Game Designer | Pear Tree, Remote

Sep 2025 – Present

Shepherd Girl: Idle Sheep Farm — Soft Launch

- **Designed the overall game**, including systems, content, balance, and monetization.
- **Currently updating game systems, balance, and content** based on live player feedback.
- **Supporting client-side development** with AI tools.

Content Designer | Puzzle Monsters, South Korea

Nov 2020 – Mar 2024

Idle Ninja Online

- **Designed monster concepts, combat scripting, boss patterns**, and new dungeon mechanics for fields and dungeons.
- **Maintained 3+ years of live service.** Contributed to maintaining 32K PU (3% conversion rate) and 40% D1 retention.
- **Event Design:** Seasonal events, event passes, and premium packages. The 2024 Lunar New Year event generated \$380K over four weeks.

Ninja Survivors Online

- **Directed overall content design**, including 100+ stages, daily/weekly dungeons, and boss raids.
- **Built gameplay prototypes to improve progression flow** by redesigning stage layouts and monster spawning systems.
- **Proposed and implemented gameplay improvements** that reduced progression bottlenecks and improved player retention.

Research Assistant | Rochester Institute of Technology, Rochester, NY

May – Dec 2018, Sep – Dec 2019

VR/AR Hearing Training Program

- **Built VR training tools on Microsoft HoloLens** for audio professionals.
- **Developed an AR game on Microsoft Surface Pro** that adapted the VR training system to support patients with hearing difficulties.

Game Design Intern | Bitmango, South Korea

Jun – Aug 2017

- **Created levels for two shipped mobile puzzle titles**, Bombrix and Bouncy Blast.

PERSONAL PROJECTS

OR-BIT & Ten Match: Block Puzzle

2025

- **Independently developed and published two hyper-casual mobile games**, both currently live on Android and iOS.
- **Used AI tools including ChatGPT** for development and art asset creation.

EDUCATION

B.S., Game Design and Development

Aug 2014 – May 2019

Rochester Institute of Technology
